

Are you a good listener? Do you care about the wellbeing of people with disabilities?

The Ohio State University Nisonger Center is looking for **self-advocates and family members of people with developmental disabilities to be interviewers**. Interviewers will conduct face-to-face conversations with Ohioans with disabilities for the National Core Indicators (NCI) Adult Consumer Statewide Surveys Project (www.nationalcoreindicators.org).

- Receive \$40 per interview carried out
- 30-60 minutes per interview
- Each interviewer is required to attend a paid training at the OSU Nisonger Center
- Help is available for all interviewers through an 1-800 line to call and consult program staff
- Interviewers will carry out at least 15 interviews per year
- Interviewers can schedule their interviews based on their availability
- Interviewers must provide or arrange their own transportation
- Most interviews will be scheduled within a 30 mile radius of interviewers.

Examples of survey questions:

Do you like your home?

Do you feel safe?

Do you have a paid job in the community?

To apply online go to: <https://www.surveymonkey.com/r/NCIapplication>
If you have questions please contact project staff member, Anna Sigman, for more information:

1-888-685-0984 or Annamarie.Sigman@osumc.edu

What is the National Core Indicators project?

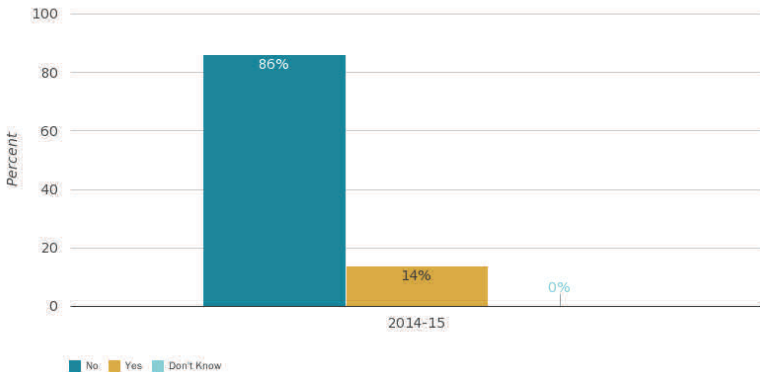

The National Core Indicators (NCI) is a way for state developmental disabilities agencies to track and measure their own performance in the form of an in-person survey or conversation with at least 400 randomly selected individuals. 46 states including Ohio are participating in the NCI project. This allows state-by-state comparisons.

What are the core indicators?

The core indicators are Community Inclusion, Satisfaction, Choice and Decision-Making, Self-determination, and Employment.

You can view data briefs, generate charts, and state-wide reports for the different core indicators on the official NCI website for Ohio and other participating states. Employment is an example of an indicator (please see chart below).

Person in Community Paid Job
The proportion of people who have a job in the community.

To generate your own chart please visit:

www.nationalcoreindicators.org

Department of
Developmental Disabilities

Who collects the data?

The Ohio State University Nisonger Center has been collecting the data and administering the in-person conversations since 2015 on behalf of the Ohio Department of Developmental Disabilities (DODD). Every year 400 conversations will take place in all 88 counties with adults 18 and over.

Who leads the in-person conversations?

The Nisonger Center makes it a priority to hire self-advocates and family members of individuals with disabilities as interviewers. These interviewers come from across the state of Ohio. Please call NCI project staff at 1-888-685-0984 if interested.

How is the information used?

These outcome data are used to monitor, make decisions, allocate resources, and develop plans to improve the quality of services for the people DODD serves across the state.

Please visit the Nisonger NCI webpage to learn more about the National Core Indicators project in Ohio:
